

Appl. No.: 10/597,458
Amdt. dated November 20, 2009
Reply to Office Action of July 20, 2009

AMENDMENTS TO THE SPECIFICATION:

On page 4 of the above-referenced patent application (as published), please amend paragraph [0057] as follows:

In case no stop request is detected during stop request? 56 the method 50 continues in loop 76, that is, increasing the counter SAM_No 62 and resetting the counter SAM_time 64. In other words, the method 50 continues to record audio in a second audio data package by entering loop 72. The loop 72 and the loop [[74]] 76 are repeated as long at no stop request is detected during stop request? 56.
